

Friends share car rides, not pills.

Illicit (illegal) fentanyl is a street drug that can cause overdose or death. It's showing up in fake pills that look like real prescription OxyContin, Adderall, Percocet, and Xanax.

You can't tell by looking whether a pill has fentanyl in it.

Only take medicine that has been prescribed to you, and don't share it with friends.

Because friends help keep one another safe.

**Everyone deserves to live,
and anyone can be a friend for life.**
