

# Friends share car rides, not pills.

**Illicit (illegal) fentanyl is a street drug that can cause overdose or death. It's showing up in fake pills that look like real prescription OxyContin, Adderall, Percocet, and Xanax.**

**You can't tell by looking whether a pill has fentanyl in it.**

**Only take medicine that has been prescribed to you, and don't share it with friends.**

**Because friends help keep one another safe.**

Everyone deserves to live,  
and anyone can be a friend for life.
